	Examiner Robert A. Siconolfi	Art Unit 3683	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 41 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 41 discloses a surface made of cast iron with a strength exceeding that of cast iron. This is impossible. The examiner assumes the applicant means to say that the treated surface of cast iron exceeds the strength of untreated cast iron.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 31-35, 37 and 39-43 are rejected under 35 U.S.C. 103(a) as being unpatentable over Jacke (U. S. Patent no. 3,274,033) in view of Hester (U. S. Patent no. 5,352,305).

Hester teaches the use of impact deformation (shot peening) on a brake drum in order to improve the surface characteristics, improving performance and durability by reducing the tensional residual stress (see column 2 lines 23-25). Hester does not teach

Art Unit: 3683

the use of ultrasonic reworking. Jacke teaches the use of ultrasonic impact deformation to reduce tensile residual stress in order to reduce crack propagation and failure in metals generically. It would have been obvious to one of ordinary skill in the art at the time the invention was made to use ultrasonic impact deformation as taught by Jacke in the reworked brake drum of Hester in order to provide greater durability and performance.

Regarding claims 35,39,40, It would have been obvious to one of ordinary skill in the art at the time the invention was made to have the specific dimensions and characteristics claimed as such is merely a design choice.
